Pulp and Paper Engineer

Description

About Us: Craste is a pioneering company committed to sustainable solutions in the pulp and paper industry. We specialize in transforming agricultural waste into eco-friendly packaging and paper products. As a Pulp and Paper Engineer at Craste, you will play a crucial role in advancing our innovative processes.

Job Overview: We are seeking a skilled Pulp and Paper Engineer to join our dynamic team. The ideal candidate will have a strong background in pulp and paper manufacturing, with a focus on sustainable practices. This role involves optimizing existing processes, implementing innovative techniques, and ensuring the quality of our final products.

Responsibilities

- 1. Process Optimization:**
 - Continuously evaluate and improve pulp and paper manufacturing processes for efficiency and sustainability.
 - Implement cost-effective measures to enhance production and reduce environmental impact.
- 2. Quality Assurance:**
 - Develop and implement quality control procedures to ensure the production of high-quality paper products.
 - Collaborate with the R&D team to introduce new materials and technologies.
- 3. Equipment Management:**
 - Oversee the maintenance and optimization of machinery used in the pulp and paper manufacturing process.
 - Coordinate with the engineering team for timely repairs and upgrades.
- 4. Environmental Compliance:**
 - Ensure adherence to environmental regulations and implement eco-friendly practices in the manufacturing process.
 - Collaborate with regulatory bodies to maintain compliance.
- 5. Team Collaboration:**
 - Work closely with cross-functional teams, including R&D, production, and quality control, to achieve company goals.
 - Provide training and guidance to junior engineers and production staff.

Qualifications

- Bachelor's or Master's degree in Pulp and Paper Engineering, Chemical Engineering, or a related field.
- Proven experience in pulp and paper manufacturing, with a focus on sustainable practices.
- Knowledge of industry trends, emerging technologies, and environmental regulations.
- Strong analytical and problem-solving skills.
- Excellent communication and interpersonal skills.
